

# BigHand Quantum

## Financial Data Warehouse

### The importance of business information

Increasing demand for accurate and timely financial data is a 'must-have' in today's competitive legal environments. The traditional approach of post event, static "management reports" and the management of numerous ad-hoc report requests through limited finance resource is no longer viable.

Lawyers and business teams need to be able to access key financial metrics in real time and analyse how these metrics are derived to effect real business change.

### BigHand Quantum

BigHand Quantum is a next generation 'source agnostic' full financial data-warehouse solution tailored for lawyers, finance and management teams based on best practice and legal domain experience. BigHand Quantum provides the ability for 'self-service' access to structured data without the need for financial or technical 'bottlenecks', bringing self-service analytics, reporting and business intelligence to everyone's fingertips.

BigHand Quantum saves significant time and cost by automating the production, distribution and consumption of key business information. Intuitive dashboards are core to the BigHand Quantum service giving users access to coherent

information tailored to their specific needs without any training requirements.

BigHand Quantum works with all legal PMS, existing reporting and other line of business systems.

### Flexibility

"Being able to slice and dice our key business information in any way and also drill down into the detail gives our team the ability view understand and manage our business properly."

### Timeliness

"Having the capability to change the metrics viewed by the team at different times of the billing period significantly increases our productivity in recording time and following up outstanding invoices."

### Autonomy

"Better access to core information by all users let's us manage the business and put less reliance on our finance team to respond to all of our questions, however small."
